DETAILED ACTION

Election/Restrictions

1. Applicant's election without traverse of claims 1-9 in the reply filed on 9/16/05 is acknowledged.

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

3. Claim 1 is rejected under 35 U.S.C. 102(b) as being anticipated by Takao (U.S. Patent 5775212).

Takao discloses a method for setting a clearance between a sliding member (1) and a guide member (3) , comprising the steps of: determining the clearance; changing the clearance by utilizing a working means (7,8); and stopping the working means when the determined clearance reaches a predetermined target clearance (Abstract; Fig.2).

Determining a clearance and stopping the working means when the determined clearance reaches is inherent in the adjusting clearance operation.

Allowable Subject Matter

4. Claims 2-9 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
